Public Notice

Proposed Significant Modification to the Clean Air Act Permit Program
Permit for
Veolia ES Orchard Hills Landfill, Inc. in Davis Junction

Veolia ES Orchard Hills Landfill, Inc. has applied for a modification of the Clean Air Act Permit Program (CAAPP) permit for its municipal solid waste landfill located at 8290 Highway 251 South in Davis Junction. The permit revisions qualify as a significant modification to the CAAPP permit. The permit is being modified to revise the Landfill Gas Collection and Control Design Plan and to incorporate changes associated with issued construction permit 05020039 including an increase in the landfill capacity and a modification to the flare to increase landfill gas flow.

The Illinois Environmental Protection Agency (Illinois EPA) has made a preliminary determination to issue a revised permit. Because the revisions would qualify as a significant modification of the current CAAPP permit, the Illinois EPA has prepared a draft of a revised permit and is accepting public comments before taking final action on the application.

Comments on the proposed revisions to the permit must be postmarked by midnight February 5, 2007. If sufficient interest is expressed in the revision, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois EPA, PO Box 19506, Springfield, Illinois, 62794-9506, phone 217/782-2113, TDD 217/782-9143.

Persons wanting more information may obtain copies of the draft permit and project summary at www.epa.gov/region5/air/permits/ilonline.htm (please look under All Permit Records, Title V, Significant Modification). These documents and the application are available at the Illinois EPA's offices at 4302 N. Main, Rockford, 815/987-7750 and 1340 N. Ninth St., Springfield, 217/782-7027 (for either location, please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The CAAPP is Illinois' operating permit program for major sources of emissions, as required by Title V of the Clean Air Act (Act). The conditions of CAAPP permits are enforceable by the public, as well as by the USEPA and Illinois EPA. In addition to implementing Title V of the Act, CAAPP permits may contain "Title I Conditions," i.e., conditions established under the permit programs for new and modified emission units, pursuant to Title I of the Act. There are Title I provisions (denoted as T1) in this permit. There is a new Title I condition 7.1.6(d) incorporating limitations from construction permit 05020039 into the CAAPP permit.
